REMARKS

The above amendment to the specification is being made to place this case in better condition for examination.

Attached hereto is a marked-up version of the changes made to the specification and claims by the current amendment. The attached page is captioned "Version with Markings to Show Changes Made."

Favorable consideration is earnestly solicited.

Respectfully submitted,
BROWDY AND NEIMARK, P.L.L.C.

VERSION WITH MARKINGS TO SHOW CHANGES MADE

Paragraph beginning at line 19 of page 13 has been amended as follows:

Suppression ofPhase phase change of the surface acoustic wave passing through the slider is not performed at the moment the surface acoustic wave passes the slider, as in the first embodiment, but is performed every moment that the surface acoustic wave reaches the gap portions formed by constructing the projection-arranged portions by a plurality of projections. Therefore, the phase change suppressing effect is improved to a greater extent than in the first embodiment and there is obtained a surface acoustic wave actuator of a higher drive efficiency.
